

NumberRing

Annex Ring Size Guide

- 1** Print the document in A4 format and make sure the page scale is set to “none” in the print options.
- 2** Measure the line on the side and check that it is exactly 50 mm (5 cm) long. If the measurement is not accurate, check that you are printing in “full size” and reprint.
- 3** Be careful not to select the “Fit to page” print option.
- 4** Choose a ring you already have, and place it on the circles below until you find one in which the printed circumference is just visible inside your ring.
- 5** If a ring falls between two sizes, we advise you to use the larger size.
